SUMMARY

I am a third-year Computer Engineering student at Naresuan University with an interest in IT development, web development, and digital content creation. I have experience working on academic projects involving web applications and database systems. I am eager to learn new skills, develop creative ideas, and apply my technical knowledge in a real working environment.

Internship Availability: 1 April – 11 June 2027

EDUCATION

Naresuan University — Phitsanulok, Thailand
Bachelor of Engineering in Computer Engineering

TECHNICAL SKILLS

Programming: C, C#, Python, C++, Java
Web & Database: HTML, CSS, ASP.NET Core, SQL, SQL Server
Tools: Visual Studio, Microsoft Office, Git, GitHub

EXPERIENCE

IT Intern — KA Science Technology *26 March – 5 June 2026*

- Assisted with website development and maintenance, including updating and managing website content according to company requirements.
- Practiced basic SEO techniques to improve website visibility and searchability.
- Received and analyzed requirements from the company, then implemented requested website updates.

Intern — Faculty of Science, Naresuan University *27 October – 14 November* 2025

- Developed a system for automatically collecting computer information from multiple devices and transmitting the data to a central computer.
- Reduced manual data collection by enabling client machines to automatically send information to a centralized system.

Intern — Faculty of Architecture, Naresuan University *4 June – 20 June* 2025

- Assisted with entering and updating information in the faculty's database for administrative tasks.
- Created graphic designs for event backdrops and faculty activities.

PROJECTS

Secure Document Management System

- Developed a document management system to help employees search for and access company documents more easily.
- Created a centralized system for managing documents such as equipment manuals, datasheets, quotations, and repair information.
- Added security features such as authentication, authorization, and access control using ASP.NET Identity.
- Developed the system using ASP.NET Core and SQL Server.
